

# Dig Minecraft?

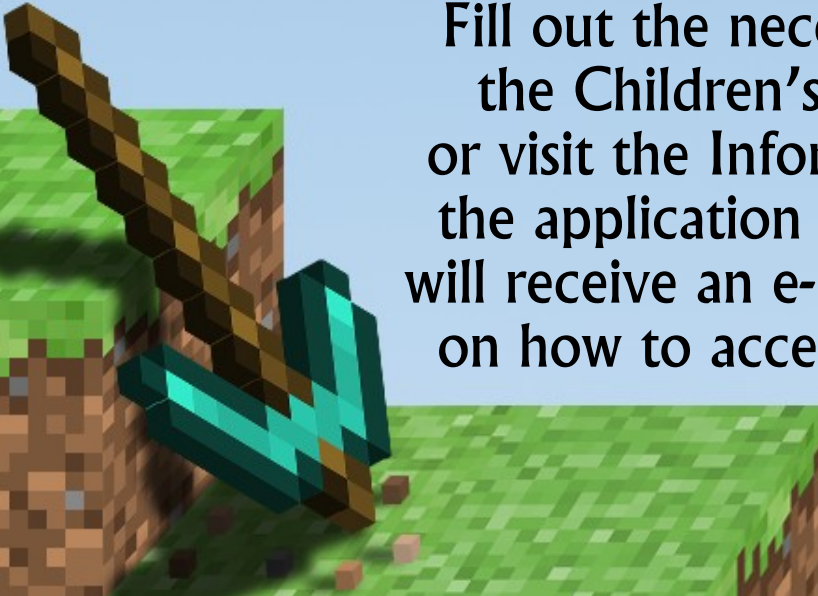

We're now accepting registration for the LION Minecraft server in the Children's Library or at the Information Desk.

LION Minecraft is a Minecraft server cooperative moderated by LION member libraries. The server is hosted and managed by Libraries Online, Inc. The purpose of this server cooperative is to provide a safe, fun, vibrant and welcoming community environment for Minecraft players from member libraries (between the grades of K-12) to gather, build, and collaborate.

## Registration Guidelines

For us to add you to the LION Minecraft server you must:

- Be a Meriden resident with a valid library card (*current fines must not exceed \$5.00*)
- Have your own Minecraft account (*PC/Mac\**)
- Be 17 years of age or under
- Agree to the Code of Conduct

A Minecraft pickaxe is shown digging into the ground. The pickaxe is a dark brown color with a teal-colored head. It is positioned diagonally, with the head pointing downwards and to the right, as if it has just finished digging a hole. The ground is composed of green grass blocks and brown dirt blocks. The background is a light blue sky.

Fill out the necessary paperwork at the Children's Information Desk or visit the Information Desk. After the application is reviewed, patrons will receive an e-mail with instructions on how to access the library server.

**\*Minecraft PE** accounts do not work on our server.
